CASSINI-HUYGENS
MISSION TO SATURN

CASSINI-HUYGENS
TO SATURN AND TITAN

Launch Date: October 15, 1997

A joint endeavor of NASA, the European Space Agency and the Italian Space Agency, Cassini will orbit the ringed planet and study the Saturnian system in detail over a four-year period. On board Cassini is a scientific probe called Huygens that will be released in December 2004 to parachute through the atmosphere to the surface of Saturn's largest moon, Titan.
